

RULE BASED TRADING

When trading the Order Block strategy we follow a 3 rule based system.

The 3 things we look at before entering are:

- 1. Look at overall market structure (Higher Highs and Higher Lows or Lower Highs and Lower Lows. Bearish or Bullish)
- 2. Look for supply or Demand zones according to the higher timeframe trend (So if the higher timeframe trend is a down trend then you would look for supply zones and if you are in a bullish market then you would demand zones
- 3. Look at the lower time frames and look for the lower time frame confirmations (this can be in the form of reaction to the 4 Hour order block or it can be order blocks forming on the lower time frames inside the higher time POI
